

Trust Through Verification

Independent Validation. Evidence-Led Assurance. Defensible Decisions.

Organisations are increasingly expected to prove that benefits, opportunities, ownership structures and social impact initiatives reach the intended recipients.

Traditional compliance confirms activity.

Izala Trust confirms outcomes.

Developed by the Izala Group and delivered through iVFS, Izala Trust™ is a strategic trust intelligence framework that combines independent validation, trust indexing and evidence-led assurance to strengthen confidence in people, beneficiaries, ownership structures, workforce participation and social impact outcomes.

By transforming trust into documented evidence, Izala Trust helps organisations make transparent, auditable and defensible decisions.

Trust is not claimed. Trust is verified.

What keeps organisations awake at night?

Organisations increasingly face governance, audit, regulatory and stakeholder scrutiny.

Critical questions need clear answers:

- ✓ Did the right person receive the benefit?
- ✓ Does the ownership structure reflect reality?
- ✓ Can workforce participation be independently validated?
- ✓ Have our skills development initiatives achieved measurable outcomes?
- ✓ Did socio-economic development funding reach the intended beneficiaries?
- ✓ Can we demonstrate impact with evidence?
- ✓ Can our decisions withstand scrutiny?

Izala Trust provides the evidence required to answer "Yes."

The Risk of getting it Wrong

Without independent validation and evidence-led assurance, organisations may face:

- Incorrect beneficiary identification
- Unsupported ownership claims
- Unverified workforce declarations
- Unconfirmed social impact outcomes
- Governance failures
- Audit findings
- Stakeholder disputes
- Reputational damage
- Regulatory exposure

Izala Trust reduces decision risk through independent validation, verification and evidence-led assurance.

What Izala Trust Validates

Ownership Index - Validation of:

- Beneficial Ownership
- Employee Share Ownership Schemes (ESOPs)
- Share Scheme Participants
- Trust Beneficiaries
- Broad-Based Ownership Structures

Supplier Index - Validation of:

- Enterprise Development Beneficiaries
- Supplier Development Initiatives
- Supplier Participation
- Beneficiary Outcomes

Workforce Index - Validation of:

- Employees
- Payroll Records
- Management Control
- Employment Equity Participation
- Disability Declarations

SED Index - Validation of:

- CSI Beneficiaries
- NGO Beneficiaries
- Social Impact Beneficiaries
- Socio-Economic Development Programmes

Skills Index - Validation of:

- Learnership Participants
- Skills Development Beneficiaries
- Training Interventions
- Bursaries
- Internships

Beneficiary Index - Validation of:

- Beneficiaries
- Dependants
- Next of Kin
- Estate Beneficiaries
- Pension Beneficiaries

Why Izala Trust

Izala Trust goes beyond traditional verification by creating confidence through evidence.

Our approach independently validates people, relationships, beneficiaries, ownership structures, workforce participation and social impact outcomes, giving organisations assurance that their decisions are based on verified information.

The result:

- Increased Transparency
- Enhanced Governance
- Improved Accountability
- Reduced Risk
- Independent Assurance
- Stronger Stakeholder Confidence
- Defensible Decisions

Powered by iVFS

Izala Trust is powered by the specialist investigation, verification and assurance capabilities of iVFS.

Leveraging proprietary methodologies and intelligence frameworks:

TITAN™ Investigation Intelligence

Transforms fragmented information into verified intelligence through structured investigation, validation and evidence gathering.

NEXUS™ Decision Intelligence

Provides confidence assessment, risk evaluation and evidence-based insights to support decision-making.

Izala Trust. Trust Through Verification. Defensible Decisions.

Portfolio of Evidence

Creates a complete, auditable and defensible record of verification activities, findings and supporting evidence.

Together, these capabilities transform validation into evidence-led assurance.

Rather than simply confirming information, Izala Trust builds a documented evidence base that supports governance, compliance, transparency and decision-making.

The goal is not simply verification.

The goal is confidence.

And confidence enables defensible decisions.

The Izala Trust Promise

We do not simply verify information.

We validate outcomes.

We provide independent evidence.

We strengthen governance.

We reduce uncertainty.

We create confidence.

We help organisations make decisions they can confidently explain, justify and defend.

Helping organisations reduce uncertainty, strengthen governance and confidently defend their decisions.

Izala Trust. Trust Through Verification. Defensible Decisions.
