

**Technology solutions for
complex and regulated business
environments.**

WHO WE ARE

NFMi is a technology solutions company specialising in custom enterprise software, AI-driven automation, and cloud-based data platforms for organisations operating in complex and regulated environments.

Strengthened by a broader compliance, audit, and telecommunications ecosystem, NFMi delivers secure, scalable, and audit-ready digital systems that streamline operations, improve governance, and enable better decision-making.

Our solutions support organisations that require integrated systems, strong digital controls, and defensible operational data.

WHAT WE DO

- Custom enterprise software and digital platforms.
- AI-powered automation, reporting and decision support.
- Cloud migration, data integration and modernisation.
- Audit, compliance, LMS and document management systems.
- Proprietary tracking, tracing and monitoring solutions.

**NFMi connects technology,
governance, and data
intelligence into a single
delivery model enabling
organisations to operate with
greater efficiency, visibility,
and confidence.**

WHAT WE DO IN PRACTICE

How NFMi capabilities are applied across real operational environments.

INTELLIGENT ENTERPRISE PLATFORMS

NFMi designs custom enterprise platforms built around operational workflow, audit evidence, and executive reporting.

Typical platforms include:

- Audit, learning, and document management systems.
- Workflow automation and approvals.
- AI-enabled reporting and dashboards.

All platforms are scalable and audit-ready by design.

AI, AUTOMATION & GOVERNANCE ENABLEMENT

NFMi applies automation and AI to improve control, visibility, and decision-making.

Delivered through:

- Automated workflows and process optimisation.
- Governance dashboards and compliance monitoring.
- Tracking, tracing, and defensible audit records.

CLOUD, DATA & INTEGRATION

NFMi modernises legacy environments and connects systems and data into secure, cloud-based architectures.

Includes:

- Cloud migration and infrastructure management.
- API and systems integration.
- Data warehousing and business intelligence.

APPLIED USE CASES

- **Audit & Compliance Platforms** – Plan → Capture → Review → Report
- **Tracking & Tracing Solutions** – Trace → Verify → Evidence
- **Learning Management Systems** – Enrol → Learn → Assess

DELIVERY OUTCOMES

- 400% improvement in audit turnaround time.
- 3,000+ employers supported through audit platforms.
- 100,000+ employees covered by audit processes.
- 98% success rate in tracking and tracing solutions.
- 100+ learners managed through LMS platforms.

NFMi enables efficient, well-controlled operations through integrated technology, automation, and data.
